

Advanced EMS Workshop - October 13 & 14, 2004
Cornell University, Ithaca, New York
Workshop Description
Registration Deadline: September 29, 2004

An Environmental Management System (EMS) workshop for college and university representatives will be given in Ithaca, New York, on the Cornell University campus. This conference will build on last year's successful "Advanced EMS Conference" by focusing presentations on implementation experiences, tools, measurement and integration. The agenda and presentations from last year's conference are available on C2E2's website at http://www.c2e2.org/ems_cornell/index.htm.

Corporate and college and university representatives will present case studies, each with a different focus on challenges relevant to colleges and universities. Speakers include representatives from Massachusetts Institute of Technology, Washington State University, University of Massachusetts – Amherst, Rhode Island School of Design, Rochester Institute of Technology and a corporate representative from Pfizer, Inc. and the Global Environmental Management Initiative (GEMI).

At this workshop you will:

- Learn about approaches to EMS implementation,
- Gain insight into how to best integrate with business systems on your campus,
- Discover EMS tools and methods employed to bridge organizational, cultural or technical differences within the organization
- Hear about the tools successful corporations are using,
- Learn about one college's experience with an ISO 14001 pre-assessment,
- Understand how a Balanced Scorecard can be used to measure the success of your EMS,
- Gain an appreciation of how compliance and sustainability efforts can be coordinated,
- Learn where other colleges and universities are in their EMS development,
- Identify resources and a network for your future EMS development and implementation questions, and
- Enjoy the fall foliage and wine that the Finger Lakes Region is known for!

We will have a "Best Practices Table" and we encourage participants to bring their favorite or most effective examples of EMS tools and best practices to share.

We hope you will join your colleagues in participating in this two-day workshop. Please read the attached materials for further information, including registration information. We will provide further details regarding additional speakers and university presentations over the next 7-10 days, as we finalize the agenda.

Thank you to our workshop sponsors!
